SUPPLEMENTARY MAERIALS

Comparative Evaluation Scale for Data Analysis Proficiency in GPT-4, SAS, SPSS, and R

Analytical methods	**Platforms**			
	GPT-4 (Python 3.9)	**SAS (Version 9.4)**	**SPSS (Version 26.0)**	**R (Version 4.3.1)**
Descriptive statistics				
Result consistency[a]				
Analytical efficiency of code or operations[b]				
User-Friendliness[c]				
Intergroup comparisons				
Result consistency				
Analytical efficiency of code or operations				
User-Friendliness				
Correlational analyses				
Result consistency				
Analytical efficiency of code or operations				
User-Friendliness				
Overall assessment[d]				

[a]Result consistency grading: (1) Highly Consistent: Exceptionally stable outcomes in complete harmony with established statistical benchmarks and expectations; (2) Consistent: Generates reliable results closely aligned with conventional statistical criteria, with minor discrepancies that do not significantly affect analytical integrity; (3) Moderately Consistent: Generally reliable outcomes with some fluctuations, necessitating minor adjustments for standard consistency; (4) Inconsistent: Results show some stability but with periodic irregularities that require additional scrutiny for dependability; (5) Highly Inconsistent: Significant variability or regular deviations from accepted statistical norms, demanding careful interpretation and validation.

[b]Analytical efficiency of code or operations grading: (1) Highly Efficient: Exceptionally streamlined code or operations, enabling highly efficient execution of complex tasks; (2) Efficient: Economical use of code or procedural steps for most tasks; (3) Moderately Efficient: Balances conciseness with functionality; more complex tasks may need additional code or steps; (4) Verbose: Excessive code or procedural steps for routine tasks, leading to procedural redundancies; (5) Highly Verbose: Extensive coding or numerous steps required for basic tasks, increasing cognitive load and complicating execution.

[c]User-Friendliness grading: (1) Highly Intuitive: Exceptionally user-friendly with an intuitive interface, accessible to a wide range of users, supported by comprehensive guidance; (2) Intuitive: User-centric design facilitating basic operations for beginners and catering to advanced users; (3) Moderate: Suitable for those with basic data analysis

knowledge, with adequate guidance despite some complexities; (4) Somewhat Challenging: Requires familiarity with data analysis software; potential exists for enhanced navigational simplicity; (5) Challenging: Demands specialized training, presenting a significant learning curve and lacking intuitive guidance for untrained users.

[d]Overall assessment grading: (1) Exceptional Capability: Outstanding performance across all functions, highly recommended for comprehensive and rigorous epidemiological research; (2) Competent Capability: Proficient in certain analytical aspects; may need additional tools for expansive epidemiological research needs; (3) Limited Capability: Notable deficiencies in overall analytical capabilities, unsuitable for detailed and thorough epidemiological research.
